Job Opportunities – February 2008

Wilde FEA Ltd. (www.WildeFEA.co.uk) provide engineering software, consulting and training services to a wide range of industries, covering mechanical, civil and manufacturing applications. Our company distributes a range of industry-leading engineering simulation and Management Information products to the UK and European markets. To support the growth in this business area we have the following vacancies:-

Senior Engineer

- Duties -* To take a senior role in the delivery of our range of CAE services, including consulting projects, providing technical support to clients and presenting training courses and software demonstrations. This position requires both technical and commercial skills to ensure the successful completion of projects. The position offers an opportunity to work with the industry leading products, such as as ANSYS, CFX, LS-DYNA, DEFORM, FLUENT and PLAXIS.
- Qualifications/Experience -* A minimum requirement of a degree in Engineering; a higher degree would be an advantage.
Chartered Engineer (or working towards chartered).
A minimum of 5 years experience applying CAE methods to engineering applications.
- Employment details -* Salary negotiable. Flexible working hours.
- Location -* Stockport, Cheshire
- Contact -* Please send a CV by post, fax or email to David Deakin, Director, Wilde FEA Ltd., Brindley Lodge, Adcroft St, Stockport, Cheshire. SK1 3HS, Fax 0161 474 7492, Email: dmdeakin@wildefea.co.uk.

Applications Engineer

- Duties -* To undertake a variety of tasks associated with our CAE related business, including consulting projects, providing technical support to clients and presenting training courses and software demonstrations. The position offers an opportunity to work with the industry leading products, such as as ANSYS, CFX, LS-DYNA, FLUENT, DEFORM and PLAXIS.
- Qualifications/Experience -* A minimum requirement of a degree in Engineering. This is a technically and commercially demanding position. Applications are particularly invited from individuals with

some finite element experience gained from studies or research.

Employment details -
